User story

ontwikkel samen met je multidisciplinaire teamgenoten een javascript applicatie;

**AS A USER I WANT TO ENTER MY
NAME,BDATE AND CITY SO THAT I CAN GET
PERSONALISED WEATHER AND FORTUNE.**

Stakeholder requirements

- design a nice responsive layout
- input name, bdate and location and submit
- display current date/time, main weather conditions (t° etc) + animated gifs (sunny, rain, windy, cloudy, partial cloudy etc...)
- display name, age (calculation), birth year and Chinese horoscope (with image)
- display a random quote/feature of the users Chinese horoscope sign.

Optional/extra challenge:

- make a shareable link for the socials :)
- display bday related zodiac force and element

TechStack / kitchen utensils

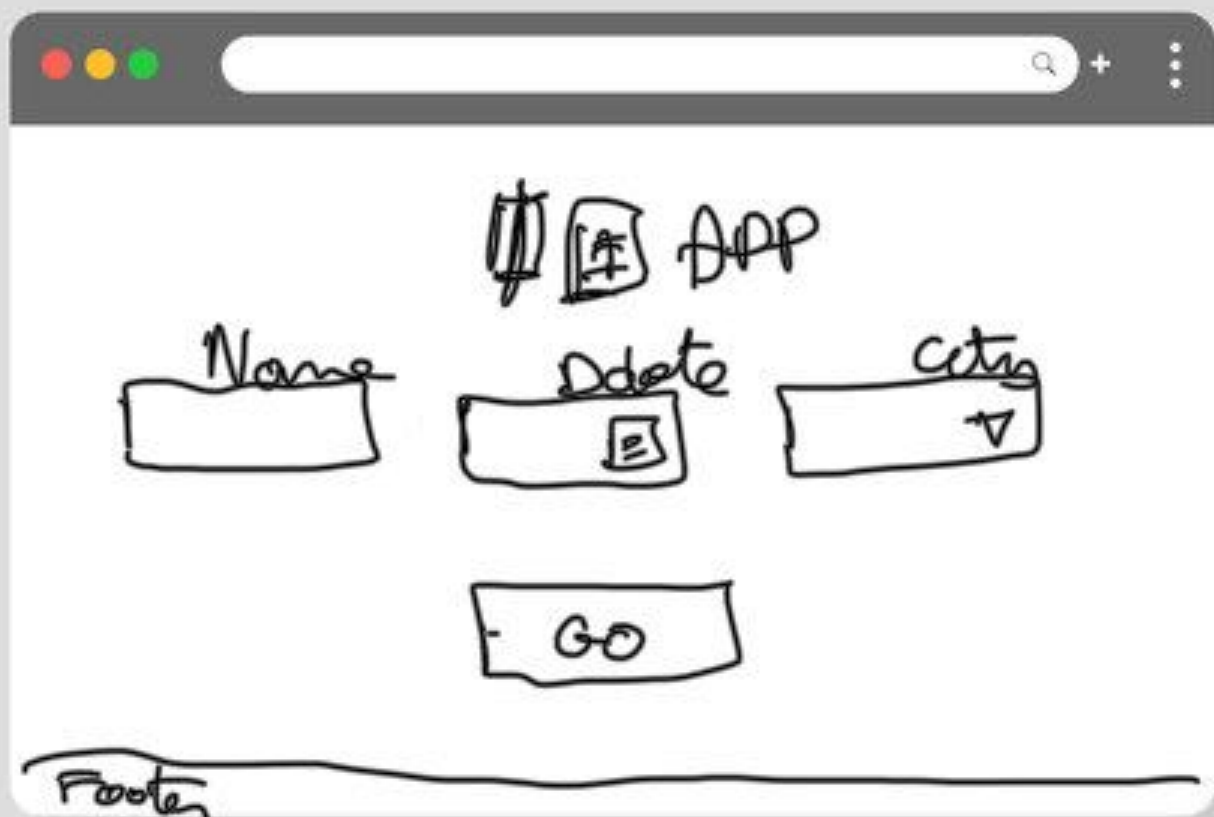

- Vanilla JS
- Bootstrap 5
- Weather API
 - <https://weather.visualcrossing.com/VisualCrossingWebServices/rest/services/timeline/brussels?unitGroup=metric&include=current&key=P9J7ZGZ9SBGSZQTDBMT86WNN3&contentType=json> (suggestion)
- Chinese horoscope details (OBJ)

Workflow

- Designate a scrum master
- Setup a github repo
- Invite collaborators
- collaborators clone into repo
- setup a shareable trello (kanban: todo,ip,done)
- create sprint backlog items and assign cards
- code, git push, eat, sleep (not to much), repeat
- test, evaluate and present application in-class
- sprint retrospective
